

Carefree sailing with the indestructible
Europti youth sailboat
supplied by Topper!

Sailing is freedom. You want your own sailboat that is simple to rig, easy to sail and no-hassle to maintain. And so the Europti was born, a practical and indestructible boat for everyone between 6 and 15 years old. The boat is an investment for the future. She will last and last and absorb any knocks effortlessly. No maintenance is needed, just cleaning, which makes the Europti ideal for schools and clubs

Philosophy

You may have noticed that the Europti looks a lot like the Optimist. This is correct, the youth sailing boat was the basis for the design of the Europti. Then we added our own special know-how. The result? A sturdy, stable, fast and manoeuvrable sailboat that guarantees tons of sailing fun.

Strong and light

The Europti is made in England utilising Topper's expertise in building the Topaz range of sailboats. This Trilam structural polyethylene construction ensures toughness without increasing hull weight. The light weight extra strength honeycomb core is surrounded by a hardseal inner skin and an exceptionally strong quality Metalicine outer skin. The Europti weighs only 39 kilos - the lightest in its class!

Easy handling

Everything on the Europti is aimed at the young sailor. Not only on the water but also ashore. On shore the boat is easily carried by its gunwale. The Europti also rows easily, the positions for the rowlocks are already moulded in. For those who want there are a number of accessories available for even more boating fun.

Europti Special Features

- The thwart, centreboard case and buoyancy tanks are connected to each other to ensure ultimate stiffness. The cockpit floor is supported by a spin weld turret.
- The bottom is reinforced with three ribs for extra stiffness and against wear and tear.
- A rubber stop at the back of the centreboard case prevents damage to the centreboard when running aground.
- A central eye in the bow makes for easy towing.
- Moulded-in stainless steel rods are used to fasten main-sheet block and toe straps.
- The Europti is self bailing via two holes in the transom that can be sealed by rubber balls. This also enables you to rinse the boat out easily.
- The Europti is supplied with an easy to use sleeved sail for total beginners or a simple racing sail for more skilled young sailors.

Important points:

- ✓ Indestructible PE (Metalicene) construction
- ✓ Light weight (39 kgs)
- ✓ Unsinkable
- ✓ Gunwhale for easy carrying
- ✓ Seamless hull
- ✓ Self bailing
- ✓ Choose between sleeve or standard sail
- ✓ Maintenance free
- ✓ Made in England

Specifications:

Length: 2.39 m
Beam: 1.21 m
Sail area: 3-3.5 m²
Weight: 39 kilos
